#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1734

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a first apparatus, classified in class 118, subclass 200.
- II. Claims 5-7, drawn to a second apparatus, classified in class 118, subclass 323.
- III. Claims 8-12, drawn to a third apparatus, classified in class 156, subclass 578.
- IV. Claims 13-18, drawn to a fourth apparatus, classified in class 118, subclass 58.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-IV are deemed independent and distinct inventions wherein each invention requires structural limitations separate and distinct from the other. The invention of Group II is distinguishable from the invention of Group I in that it requires two or more pick and place devices that periodically contact and recontact a coating at different positions such the periods of the devices are selected to provide uniform coating while the invention of Group I is to plural rotating pick and place devices that periodically contact and recontact a coating at different positions wherein periods of the devices are not periodically related. The invention of Group III is to two or more pick and place devices that periodically contact and recontact a coating at different positions on a first substrate and a coating from the first substrate is transferred to a second substrate via a transfer station. The invention of Group IV is to pick and place devices that contact and recontact an uneven wet coating to increase drying rate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Bryan Szymanski on 9/23/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Edwards whose telephone number is (571) 272-1227. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached on (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
